

Moonrise XL

We like creating compact sofas or large armchairs. Moonrise XL is the result of this, a special piece designed for those couples who love each other and like to enjoy their relax moments together. It is a new typology of recliner for two people, a unique, great and charming piece. The reclining system works with a remote control and can be stopped in different positions. This model has two independent adjustable headrests. If you don't want to fall into temptation, you'd better not try it.

The version of our Moonrise model for sharing, we like to call it You&Me, armchairs of generous dimensions that allow us to enjoy them in company.
